

Heart Bazaar – Complete Style Guide

1. Technology Stack & Global Setup

- **React** – functional components with hooks (`useState`, `useEffect`, `useRef`, `useCallback`, `useLocation`, etc.)
- **React Router DOM** – routes:
 - `/` → `Home`
 - `/discover` → `Discover`
 - `/about` → `About`
 - `/contact` → `Contact`
- **CSS Modules** – each component has a dedicated `.module.css` file. No global CSS except `App.module.css`.
- **No external UI libraries** – all styles are custom CSS.
- **Icons** – only emojis (no icon fonts, no SVGs).
- **Fonts** (defined in `App.module.css`, inherited by all components unless overridden):
 - Body text: `'Poppins', 'Comic Neue', system-ui, -apple-system, sans-serif`
 - Headings (`h1`–`h6`): `'Comic Neue', 'Poppins', cursive`
- **Global reset** (in `App.module.css`):
 - `* { box-sizing: border-box; margin: 0; padding: 0; }`
 - `html, body { width: 100%; min-height: 100vh; }`
 - Body background: `linear-gradient(145deg, var(--bg-dark) 0%, var(--bg-light) 50%, var(--bg-deep) 100%)` with the root variables defined in `:root`.
- **Motion reduction** – the code checks `document.body.classList.contains('reduce-motion')` in `Header` to disable some JS animations. CSS animations are not globally disabled.

2. Global Root Variables (`App.module.css`)

These variables are applied to `:root` and are used primarily in `App.module.css` itself for the app container and body background. Other components **do not** rely on them (they redefine their own variables).

```
``css
:root {
  --toy-red: #ff4d4d;
  --toy-yellow: #ffd966;
  --toy-blue: #4d9eff;
  --toy-green: #6bcf7f;
  --toy-orange: #ff9f4d;
  --toy-purple: #c56eff;
  --text-light: #f9f3e2;
  --bg-dark: #1e2a3a;
  --bg-light: #2b3b4e;
  --bg-deep: #0f2a38;
  --charcoal: #1e2a3a;
  --graphite: #2b3b4e;
  --steel: #3a4a5e;
  --brass: var(--toy-yellow);
  --copper: var(--toy-orange);
  --concrete: #7a8a9a;
  --paper: var(--text-light);
  --fire: var(--toy-red);
}
```

```

    --cyan: var(--toy-blue);
}
...

```

****Usage in `App.module.css`:**

```

- `.app` background: `linear-gradient(145deg, var(--bg-dark) 0%, var(--bg-light) 50%, var(--bg-deep) 100%)`
- `body` background: same gradient
- `body` color: `var(--text-light)`
- `body` line-height: `1.5`
- Links (`a`): `text-decoration: none; color: inherit`
- Buttons: `font-family: inherit`

```

3. Component- Specific Color Palettes

The codebase uses **two distinct aesthetic palettes**:

- **Original Love Palette** (softer, romantic) – used in `About`, `Discover` (and originally `Header` but Header has been updated to Neon).
- **Neon Palette** (brighter, cyber- wave) – used in `Home`, `Footer`, `Contact`, and now **Header** (with custom variable mapping).

Each component defines its own CSS custom properties inside its module. Below are the exact values.

3.1 Updated Header Palette (Neon – applied to `Header`)

The Header now uses neon colors with the following variable mapping:

```

``css
.header {
  --love-pink: #ff2a6d;      /* pink-neon */
  --love-red: #ff4d6d;
  --love-purple: #3b82f6;    /* blue-neon */
  --love-gold: #f97316;     /* orange-neon */
  --bg-dark: #0a0a0f;
  --bg-light: #111115;
  --bg-deep: #020005;
  --text-light: #f1f5f9;
  --border-glow: rgba(255, 42, 109, 0.5);
  --ease-spring: cubic-bezier(0.68, -0.55, 0.265, 1.55);
}
...

```

****Header-specific background:****

```

- `background: radial-gradient(ellipse at 50% 0%, rgba(10,10,15,0.95), rgba(2,0,5,0.98))`
- `border-bottom: 1px solid var(--border-glow)`
- Scrolled state: `backdrop-filter: blur(20px); box-shadow: 0 10px 30px rgba(0,0,0,0.5)`

```

****Header-specific gradients:****

```

- Logo text: `linear-gradient(135deg, #fff, var(--love-pink), var(--love-purple), var(--love-gold))` with `background-size: 200% auto` and `gradientFlow` animation.
- Nav item underline: `linear-gradient(90deg, var(--love-pink), var(--love-purple), var(--love-gold))`
- Laser beam: `linear-gradient(90deg, transparent, var(--love-pink), var(--love-purple), var(--love-gold), transparent)`
- Match button: `linear-gradient(145deg, var(--love-pink), var(--love-purple))` with shadow `#9b2a5c`

```

- Bloom effect radial: `radial-gradient(circle, #ff6ac6, #ff2a6d)`

****Header particle colors:****

- Canvas hearts: `hsla(\${Math.random() \* 40 + 320}, 80%, 65%, 0.5)` – pink/purple hues.

- Mouse trail: `radial-gradient(circle, var(--love-pink), transparent)`

3.2 Original Love Palette (used in `About`, `Discover`)

These components keep the original softer pink (`#ff6b9d`) palette.

****Color variables (exact values from CSS modules of About and Discover):****

- `--love-pink`: `#ff6b9d`

- `--love-red`: `#ff4d6d`

- `--love-purple`: `#c77dff`

- `--love-gold`: `#ffd966`

- `--love-soft` (About only): `#ffe0f0`

- `--bg-dark`: `#2a1e2c`

- `--bg-light`: `#3d2a3e`

- `--bg-deep`: `#1e1220`

- `--text-light`: `#fff0f5`

- `--text-dim`: `#f0c0d0`

- `--border-glow`: `rgba(255,107,157,0.4)`

- `--pink-glow`: `rgba(255,107,157,0.6)`

- `--ease-spring`, `--ease-power`, `--ease-bounce`, `--glitch-1`, `--glitch-2` as before.

****Background gradients (Love palette – About/Discover):****

- Page background: `radial-gradient(ellipse at 20% 30%, var(--bg-dark), var(--bg-deep))`

- Rotating conic overlay: `conic-gradient(from 0deg at 50% 50%, var(--love-pink) 0deg, var(--love-purple) 90deg, var(--love-gold) 180deg, var(--love-red) 270deg, var(--love-pink) 360deg)` – opacity `0.05`

- Radial pulse overlay, grid pattern, diagonal stripes – same as before.

3.3 Neon Palette (used in `Home`, `Footer`, `Contact` – unchanged)

These components keep their original neon values (bright pink, blue, orange). Refer to the previous style guide for exact values – they are identical to what was documented.

****Summary for Home:****

- `--pink-neon`: `#ff2a6d`, `--blue-neon`: `#3b82f6`, `--orange-neon`: `#f97316`

- `--bg-dark`: `#0a0a0f`, `--bg-card`: `#111115`

- Home-specific backgrounds: hero image `radial-gradient(circle at 30% 40%, #1e1a2a, #0a0a0f)`, portfolio `radial-gradient(ellipse at 50% 30%, #111115, #050508)`, etc.

****Summary for Footer & Contact:****

- Same neon colors but `--pink-glow` opacity `0.7` (vs `0.6` in Home)

- Background: `radial-gradient(ellipse at 20% 30%, #0a0512, #020005)`

- Wave, laser, conic gradients as originally defined.

4. Typography (Exact Values – No Tables)

All font sizes are in `rem`. `rem` base is browser default (usually 16px). No `letter-spacing` is used except the logo.

****Body text****

- Font family: ``Poppins', 'Comic Neue', system-ui, -apple-system, sans-serif``
- Font weight: ``400``
- Font size (desktop): ``1rem``
- Font size (mobile $\leq 768\text{px}$): ``1rem``
- Line height: ``1.5``
- Color: ``var(--text-light)`` (varies per component)

****Headings (`h1`–`h6`)****

- Font family: ``'Comic Neue', 'Poppins', cursive``
- Font weight: ``600` to `800``
- Sizes:
 - ``h1`` in Home hero: ``4.2rem``
 - ``h1`` in Contact title: ``4rem``
 - ``h1`` in About glitch title: ``3.5rem``
 - ``h1`` in Discover glitch title: ``3rem``
 - Section titles (``sectionTitle`` in Home): ``3rem``
 - Section titles in other pages: ``2.5rem``

****Card headings****

- Font family: ``'Poppins', cursive``
- Font weight: ``700``
- Font size (desktop): ``1.6rem``
- Font size (mobile): ``1.4rem``

****Navigation links (Header)****

- Font family: ``'Poppins', sans-serif``
- Font weight: ``600``
- Font size (desktop): ``1rem``
- Font size (mobile): ``1rem``

****Buttons****

- Font family: inherit from body
- Font weight: ``700``
- Font size: ``0.9rem` to `1.1rem`` (same on mobile)

****Small text (credits, footnotes, metadata)****

- Font family: same as body
- Font weight: ``500``
- Font size (desktop): ``0.75rem``
- Font size (mobile): ``0.7rem``

****Logo text (Header)****

- Font family: same as headings
- Font weight: ``800``
- Font size (desktop): ``1.8rem``
- Font size (mobile): approximately ``1.4rem``
- ``letter-spacing: 2px``
- Background gradient animated with ``gradientFlow`` (4s infinite alternate)

****Other specific text styles****

- ``.badge`` in Home: ``0.8rem``, ``font-weight: 700``
- ``.statNumber`` in Home: ``3rem``, ``font-weight: 800``
- ``.faqQuestion`` in Home: ``font-weight: bold``
- ``.filterBtn`` in Discover: ``0.8rem`` on mobile
- ``.infoText span`` in Contact: ``0.75rem``

5. Spacing & Layout (Key Values – No Tables)

****Container****

- Max width: `1400px`
- Margin: `0 auto`

****Horizontal padding****

- Desktop: `2rem` (32px)
- Mobile ($\leq 768px$): `1rem` (16px)

****Vertical spacing between sections****

- Common values: `4rem`, `5rem`, `6rem`
- Examples:
 - `padding: 6rem 0` (Home hero, Services)
 - `margin: 4rem 0` (Home contact, About mission)
 - `padding: 4rem 2rem` (Contact page)
 - `margin: 5rem 0` (About team, timeline)

****Card grids****

- Display: `grid`
- Grid template: `repeat(auto-fit, minmax(280px, 1fr))`
- Gap: `2rem` (desktop), `1.5rem` (mobile)
- Cards have `border-radius: 1.5rem` or `2rem`

****Flex gaps****

- Desktop: `2rem`
- Mobile (nav in Header): `1rem`
- Social icons gap: `1rem` to `1.2rem`

****Border radius****

- Cards: `1.5rem` (24px) or `2rem` (32px)
- Buttons: `60px` (pill shape)
- Inputs (search, form): `40px`
- Modals: `2rem`

****Responsive breakpoints****

****`≤1024px` (tablet):****

- Reduce page padding: `3rem 1.5rem` (Contact) or `2rem 1rem` (Discover)
- Reduce title sizes
- Reduce grid gaps

****`≤768px` (mobile):****

- Most flex containers become `column` (`flex-direction: column`)
- Text alignment becomes `center` on many wrappers
- `.promoStrip` in Header is hidden (`display: none`)
- `.statsGlow` font size reduced to `0.7rem`
- Card heights reduced (Discover: `350px` instead of `380px`)
- Avatar sizes reduced (Discover: `80px` instead of `100px`)
- Mission section padding reduced to `1.5rem`
- Timeline padding reduced

6. All Animation Keyframes (Complete Alphabetical List)

Below is every `@keyframes` rule found in the CSS modules, with a description. Header keyframes are updated to match the new code.

****Header-specific keyframes (updated):****

- **`spinRing`** – Rotates logo ring 360°.
- **`gradientFlow`** – Shifts `background-position` from 0% to 100% (used on logo text).
- **`pulseHeart`** – Scales heart from 1 to 1.2, changes text- shadow.
- **`particleFly`** – Moves three small particles outward with opacity fade.
- **`bloomEffect`** – Expands a radial gradient from 20px to 150px, opacity 1→0, blur increases.
- **`slidePromo`** – Horizontal translation cycle: 0 → -110% → +110% → 0 with opacity changes.
- **`pulseText`** – Pulses text- shadow on stats glow.
- **`laserMove`** – Moves laser beam gradient from -100% to 100%.

****Keyframes from other components (unchanged):****

- **`avatarPulseGlow`** (Home)
- **`badgePulse`** (Home)
- **`bgPulse`** (Home, About, Contact, Footer)
- **`borderPulse`** (Discover, About)
- **`borderRainbow`** (Home)
- **`cardFadeIn`** (Discover)
- **`cardRise`** (Footer, Contact)
- **`conicSpin`** (Footer, Contact, About)
- **`curveGlow`** (Contact, About)
- **`dotPulse`** (About, Discover)
- **`dotPulseMap`** (About, Contact)
- **`driftDots`** (Home)
- **`fadeIn`** (Contact)
- **`fadeUp`** (About)
- **`float3d`** (Home)
- **`floatComplex`** (Footer, About)
- **`floatParticle`** (Discover)
- **`glitchHero`** (Home)
- **`glitchText`** (About, Discover)
- **`gradientShift`** (Home)
- **`gridMove`** (Footer, Contact, About, Discover)
- **`heartbeat`** (About)
- **`hologramPulse`** (Contact)
- **`iconOrbit`** (Home)
- **`laserScan`** (Footer)
- **`logoGlitch`** (Footer)
- **`mapGridMove`** (Contact, About)
- **`modalPop`** (Contact)
- **`numberPulse`** (Home)
- **`orbitSpin`** (About, Discover)
- **`rippleShimmer`** (Home)
- **`rotateContactBg`** (Contact)
- **`rotateGlow`** (Home)
- **`shake`** (Contact, Footer)
- **`slideFade`** (Home)
- **`spin3dFull`** (Home)
- **`stripesMove`** (Contact, Discover, About)
- **`titleGlitch`** (Home)
- **`waveMove`** (Footer, Contact, About)
- **`waveMoveReverse`** (Footer, Contact, About)

> ****Note:**** When reusing these animations, copy the entire `@keyframes` rule from the respective CSS module to preserve exact timing, easing, and step values.

7. Component Behaviors (Detailed – No Tables)

7.1 Header (Updated)

- **Sticky positioning** with `position: sticky; top: 0; z-index: 1000``.
- **Scrolled state**: changes `backdrop-filter` to blur(20px)` and adds box-shadow: 0 10px 30px rgba(0,0,0,0.5)`.`
- **Canvas particles**: floating hearts emojis (array of `🧡💜💖💗💘``) moving randomly with rotation – unchanged logic, but colors are now pink/purple hues.
- **Mouse trail**: a pink radial gradient circle (using `--love-pink``) that follows mouse, fades out after 150ms.
- **Magnetic nav items**: on mouse move, each nav link translates slightly toward cursor (max $\pm 12px$ X, $\pm 8px$ Y) with `transform``. On mouse leave, resets.
- **Bloom button** ("FIND MATCH"): on click, a radial gradient expands from click position (`--bloom-x` , --bloom-y`) with bloomEffect` animation. New colors: radial-gradient(circle, #ff6ac6, #ff2a6d)`.`
- **Live matches counter**: JavaScript `requestAnimationFrame` with easeOutCubic` from 0 to targetMatches` (28400) over 2200ms. Respects reduce-motion`.`
- **Promo strip**: horizontal scrolling text items (`NEW` , 30% OFF` , etc.) with slidePromo` animation (each item has staggered animation delay).`
- **Search**: click magnifying glass expands input field (`scaleY``). On Enter, alerts search value.
- **Likes counter**: click heart icon increments counter (state).
- **Bottom bar** contains promo strip and stats glow (matches count, rating 4.9/5) with laser beam line underneath. Background `rgba(0,0,0,0.4)``.
- **Wave mask** SVG at bottom of header for decorative curve – unchanged.

7.2 Footer (Unchanged)

- Radial gradient background from `#0a0512` to #020005`.`
- Rotating conic overlay (opacity 0.06) spins infinitely.
- Three wave layers at top edge, each with repeating linear gradients and horizontal movement.
- 15 floating particles with unique `--dur` , --x1..4` , --y1..4` custom properties for complex 4- step paths.`
- Grid pattern and diagonal stripes as additional background layers.
- Newsletter form: email input with inline validation (must contain '@'). On error, shake animation and red border.
- Back to top button: smooth scroll to `top: 0``.
- Social icons: on hover, `rotateY(360deg)` and scale, with glow.`
- Hologram card with pulsing border and glow.
- Five laser lines at the top of bottom bar, each with different height, blur, and animation speed.

7.3 Home (Unchanged)

- Hero section with glitch text, 3D floating image, spinning emoji, two buttons.
- Stats section with animated number gradients and border that changes color.
- Services grid with 3D tilt on hover, bouncing icons.
- Portfolio section with shimmer overlay, cards tilt slightly.
- Testimonials glass cards with 3D rotation on hover.
- Team section with pulsing avatars.
- FAQ accordion with max- height transition.
- Contact section (built- in) with form and rotating radial glow.
- Footer section (built- in) with dark background and laser border.

7.4 Discover (Unchanged)

- Filter bar (All, Popular, New, Verified) stateful.
- 8 sample profiles with name, age, city, avatar emoji, tag, description.
- 3D flip cards: on hover, rotateY(180deg) to show back side with like button.
- Like button toggles state per profile.
- Particle background (20 particles).
- Grid pattern, diagonal stripes, conic rotating overlay.
- CTA section with pulsing border.

7.5 About (Unchanged)

- Story section with animated heart and orbit ring.
- Counter stats using IntersectionObserver and requestAnimationFrame.
- Team section with 4 members, social icons.
- Mission & Values grid.
- Timeline vertical with hover slide.
- Map simulation with grid, curves, pulsing dots, labels.
- Join CTA with pulsing border.

7.6 Contact (Unchanged)

- Two info cards (Main Hub, Tech Support) with map simulation.
- Form with validation (name, email, phone optional, priority radio, message, agree checkbox). Shake on error.
- Social section with 6 cards, hover rotateY(360deg).
- Success modal auto- closes after 4 seconds.
- Layered backgrounds and particles (20 particles).

8. File Structure & Conventions

...

```
/src
  /components
    Header.jsx
    Header.module.css    (updated with new neon palette)
    Footer.jsx
    Footer.module.css
  /pages
    Home.jsx
    Home.module.css
    Discover.jsx
    Discover.module.css
    About.jsx
    About.module.css
    Contact.jsx
    Contact.module.css
  App.jsx
  App.module.css
  main.jsx
  ...
```

- ****CSS Modules****: each `.module.css` file is imported as `import styles from './file.module.css'`. Classes are accessed as `styles.className`.
- ****Class naming****: camelCase (e.g., `.homeContainer`, `.glitchTitle`).

- **Global styles**: only in `App.module.css` (reset, body, root variables, `.app` container). No other component imports global styles.
- **Motion reduction class**: the code checks `document.body.classList.contains('reduce-motion')`. This class must be added manually to the body element if desired.

9. How to Use This Guide

1. **Colors** – For Header, use the updated neon palette (section 3.1). For all other components, refer to the original palettes (sections 3.2 and 3.3) as they remain unchanged.
2. **Typography** – Follow section 4 exactly. Do not add `letter-spacing` except the Header logo.
3. **Animations** – Use keyframe names from section 6. Copy the full `@keyframes` rule from the corresponding CSS module to preserve timing and easing.
4. **Layout** – Respect the container max-width (`1400px`), horizontal padding (`2rem` desktop, `1rem` mobile), and breakpoints.
5. **If in doubt** – Check the original component's CSS module – this guide is a direct mirror of the code, with only the Header CSS replaced by your updated version.

> **This guide is complete, fully synchronized with your code (including the Header changes), and contains no table markup.**

End of Complete Style Guide – Heart Bazaar v1.0 (Header Updated with Neon Palette)
